Part III DETAILED ACTION

Information Disclosure Statement

1. The prior art submitted on 04/29/99, 8/12/99, 10/4/99 has been considered as indicated on the enclosed copies of form PTO-1449
2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-55, drawn to a method for using a computer to facilitate a transaction, classified in class 705, subclass 26.
 - II. Claim 56, drawn to means for interfacing a plurality of participants and detecting participant user interface, classified in class 709, subclass 200.
 - III. Claims 64-66, drawn to a system for facilitating electronic commerce transaction and returning interest on positive balances in an account, classified in class 705, subclass 35.
3. The inventions are distinct, each from the other because of the following reasons:

Inventions I, II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as "a method for using a computer to facilitate a transaction between a sell and at least one buyer, comprising: receiving at the computer a binding offer to sell an item which includes a binding sale price; outputting the binding offer to sell a plurality of potential buyers; and receiving acceptance of said binding offer to sell

Art Unit: 2763

said item from at least one buyer, said buyer tendering acceptance by providing payment information.” In the instant case, invention II has separate utility such as “means for detecting participant user interface programs; and means for providing access to a new user interface program to said plurality of users.” In the instant case, invention III has separate utility such as “means for returning interest on positive balances in said accounts of said plurality of data packet network users.” See MPEP § 806.05(d).

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. An interview was conducted with John Phillips on March 21, 2000 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).
